How far the Honour of the Crown and Kingdom may be concerned in this Point, is a matter too high for me to preſume to inquire into. But it may not be improper to take notice, that as this Money now paſſes by Tale, we have it impoſed upon us for conſiderably more than its juſt Value.

Some People are perſuaded to believe that the *Portugal* Pieces which go at 3 £ 12*s*. and 1 £ 16*s*. are proportionably worth more than Guineas at 1 £ 1*s*. but this is really not true.

By the Weight of theſe Pieces, as they riſe one with another, a Pound Weight of Gold Troy muſt be coined into 13 Pieces of 3*l*. 12*s*. or 26 Pieces of 1*l*. 16*s*. and ſo every Piece of 3*l*. 12*s*. ſhould weigh 443 grs. $\frac{1}{13}$ or 18 dwts. 11 Grains $\frac{1}{13}$; and every Piece of 1*l*. 16*s*. ſhould weigh 221 $\frac{14}{26}$ or 9 dwts. 5 Grains $\frac{1}{2}$ and a ſmall fractional Part of a Grain. I have by chance found ſome

The Pieces call'd *Moeda d'oro* or Moidores, going at One Pound ſeven Shillings, are yet more deficient, and great Numbers of them have been diminiſhed.

If a Pound weight of Gold be divided into thirty-four Moidores and three Quarters, then every Moidore ſhould weigh 6 dwts. 21 Grains $\frac{3}{4}$; but I have weighed ſome Hundreds of them, and rarely find one that weighs above 6 dwts. 20 Grains, many but 6 dwts. 18 Grains, ſome not above 6 dwts. 17 Grains, even of thoſe which have not been diminiſh'd. A Pound weight of Gold in Moidores at 1*l*. 7*s*. each (ſuppoſing them every one to weigh 6 dwts. 21 Grains $\frac{3}{4}$, and the Gold to be equal to our Standard, which
